W. Yang, Tsinghua University, Beijing, China

Publication Frequency: 10 issues/annum

Publishing Office: Pergamon Press plc, Pergamon House, Bampfylde Street, Exeter EX1 2AH, England [*Tel.* Exeter (0392) 51558; *Fax* (0392) 425370].

Subscription and Advertising Offices: *North America:* Pergamon Press Inc., 395 Saw Mill River Road, Elmsford, NY 10523, U.S.A., *Rest of the World:* Pergamon Press plc, Headington Hill Hall, Oxford OX3 0BW, England [*Tel.* Oxford (0865) 794141].

Subscription Rates: Annual institutional rate (1991) DM 1000.00; 2-year institutional rate (1991/92) DM 1900.00; a personal subscription rate for those whose library subscribes at the regular rate is available on request. Subscription rates for Japan include despatch by air and prices are available on application. Prices are subject to amendment without notice.

Back Issues: Back issues of all previously published volumes, in both hard copy and on microform are available direct from Pergamon Press offices.

Accordingly, the publishers, the editorial board and editors and their respective employees, officers and agents accept no responsibility or liability whatsoever for the consequences of any such inaccurate or misleading data, opinion or statement.

Photocopying information for users in the U.S.A.: The Item-fee-Code for this publication indicates that authorization to photocopy items for internal or personal use is granted by the copyright holder for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service provided the stated fee for copying, beyond that permitted by Section 107 or 108 of the US Copyright Law, is paid. The appropriate remittance of $3.00 per copy per article is paid directly to the Copyright Clearance Center Inc., 27 Congress Street, Salem, MA 01970, U.S.A.

Permission for other use: The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works or for resale. Specific written permission must be obtained from the publisher for such copying.

The Item-fee Code for this publication is: 8756-758X/91 $3.00 + 0.00

CONTENTS

Number 1

Editorial Comment	i	
Ryoichi Koterazawa and Takayoshi Nosho	1	Creep-fatigue crack growth and fractography of a Type 304 stainless steel at elevated temperature
Y. Dai, M. Rödig and J. Altes	11	Calculation of the stress intensity factor for a partial circumferentially cracked tube loaded in bending by using the shell line-spring model
M. Bílý	25	Experimental verification of random load fatigue endurance
W. O. Soboyejo and J. F. Knott	37	The propagation of non-coplanar semi-elliptical fatigue cracks
D. W. A. Rees	51	The fatigue life of thick-walled autofrettaged cylinders with closed ends
M. Takeuchi, R. B. Waterhouse, Y. Mutoh and T. Satoh	69	The behaviour of fatigue crack growth in the fretting-corrosion-fatigue of high tensile roping steel in air and seawater
S. Mall, T. Nicholas, J. J. Pernot and D. G. Burgess	79	Crack growth in a titanium aluminide alloy under thermal mechanical cycling
M. T. Yu, D. L. DuQuesnay and T. H. Topper	89	Notched fatigue behaviour of two cold rolled steels
C. P. Blankenship Jr and E. A. Starke Jr	103	The fatigue crack growth behavior of the Al–Cu–Li alloy Weldalite 049
M. François and L. Rémy	115	Thermal-mechanical fatigue of MAR-M 509 superalloy. Comparison with low-cycle fatigue behaviour
R. L. Jones and P. C. Davies	131	The effect of strain rate on the tensile and fracture properties of BS 4360 'A' grade ship steel
	I	Information on Conferences/Seminars
	IV	Software Survey Section

Number 2/3

SHORT FATIGUE CRACKS

Editorial Comment	v	
Sun Ig Hong and Campbell Laird	143	Fatigue crack initiation and growth behavior of Cu–16 at.% Al single crystals
A. Plumtree and B. P. D. O'Connor	171	Influence of microstructure on short fatigue crack growth
D. J. Nicholls and J. W. Martin	185	A comparison of small fatigue crack growth, low cycle fatigue and long fatigue crack growth in Al–Li alloys
A. Vašek and J. Polák	193	Low cycle fatigue damage accumulation in Armco-iron
M. Vormwald and T. Seeger	205	The consequences of short crack closure on fatigue crack growth under variable amplitude loading
M. N. James, R. B. Tait and D. G. Mech	227	Compression fatigue in β''-alumina
Hong Youshi, K. J. Miller and M. W. Brown	237	Complex stress functions and plastic zone sizes for notch cracks subjected to various loading conditions
G. M. Seed and K. J. Miller	259	Short cracks at biaxially stressed notches: a fine-mesh elastic-plastic finite element analysis
Zuyu Sun, E. R. de los Rios and K. J. Miller	277	Modelling small fatigue cracks interacting with grain boundaries
C. H. Wang and K. J. Miller	293	The effect of mean shear stress on torsional fatigue behaviour
I. W. Hussey, J. Roche and L. Grabowski	309	A fully automated system for monitoring short crack growth
Yoshiaki Akiniwa, Shoji Harada and Yoshihiro Fukushima	317	Dynamic measurement of crack closure behaviour of small fatigue cracks by an interferometric strain/displacement gauge with a laser diode

D. Taylor and O. M. Clancy — 329 The fatigue performance of machined surfaces

Y. Verreman and B. Nie — 337 Short crack growth and coalescence along the toe of a manual fillet weld

S. Z. Wang, K. J. Miller, M. W. Brown and E. R. de los Rios — 351 A statistical analysis of short fatigue crack growth

X. J. Wu — 369 *Technical Note*: Behaviour of short fatigue cracks in a medium carbon steel subjected to bending

Number 4

W. J. Plumbridge and E. G. Ellison — 373 Stress response behaviour of a cast nickel base superalloy subject to combined creep-fatigue

S. J. Wang, D. Baptiste, Ph. Bompard and D. François — 391 Microscopic failure mechanisms of an unidirectional glass fiber composite

Karl-Heinz Schwalbe and Alfred Cornec — 405 The Engineering Treatment Model (ETM) and its practical application

S. K. Koh and R. I. Stephens — 413 Mean stress effects on low cycle fatigue for a high strength steel

D. L. McDiarmid — 429 A general criterion for high cycle multiaxial fatigue failure

R. C. McClung — 455 Crack closure and plastic zone sizes in fatigue

P. J. Budden and M. R. Jones — 469 A ductile fracture model in mixed Modes 1 and 2

PRACTICAL APPLICATIONS OF FRACTURE MECHANICS

Editorial Comment	v	
D. J. Smith	601	Prediction of remaining life of high temperature components using non-linear fracture mechanics
M. D. Gilchrist and R. A. Smith	617	Finite element modelling of fatigue crack shapes

T. K. Hellen — 627 The virtual crack extension method for creep fracture

R. Akid and K. J. Miller — 637 Short fatigue crack growth behaviour of a low carbon steel under corrosion fatigue conditions

W. S. Blackburn — 651 Numerical results for volume, surface and contour integrals around crack tips

J. P. Dear — 663 Study of the physical properties of polyethylene polymers that affect crack initiation and propagation

R. D. Whitehead — 679 Crack-following for accurately determining fracture toughness

E. M. Remzi — 697 Recent studies initiated by the NAFEMS Fracture Mechanics Working Group

I Information on Conferences/Seminars

III Software Survey Section

VII New Patents

Number 7

D. Damri and J. F. Knott — 709 Transient retardations in fatigue crack growth following a single peak overload

E. G. Ellison and W. J. Plumbridge — 721 Cyclic damage and fracture in a cast nickel based alloy at high temperature

Ri-ichi Murakami, Yun-Hae Kim and W. G. Ferguson — 741 The effects of microstructure and fracture surface roughness on near threshold fatigue crack propagation characteristics of a two-phase cast stainless steel

H. Ghonem and D. Zheng — 749 Oxidation-assisted fatigue crack growth behavior in alloy 718—Part I. Quantitative modeling

D. Zheng and H. Ghonem — 761 Oxidation-assisted fatigue crack growth behavior in alloy 718—Part II. Applications

Ri-ichi Murakami and Shinji Noguchi 769 Fatigue crack propagation characteristics of glass fibre reinforced polycarbonate in hot distilled water

R. L. Jones, J. R. Gordon and N. V. Challenger 777 A study of specimen size on J–R curve behaviour

Gao Husheng, Gu Haicheng and Zhou Huijiu 789 The effect of hardness on the fretting fatigue of alloy steels

I Information on Conferences/Seminars

III Software Survey Section

Number 8

I. Milne 797 ESIS guidelines for the selection and use of methods for assessment of the integrity of structures and components containing defects

H. Ghonem and M. Zeng 805 Prediction of fatigue crack growth under single overload application in Ti–6Al–4V

Naoyuki Suzuki, Harumasa Takeda, Akihiko Ohta and Hisasi Ohuchida 815 Evaluation of fatigue crack propagation properties under random loading avoiding crack closure

G. R. Sutton, C. Wheeler, C. E. Thomas and R. N. Wilson 823 The determination of R-curves for short, wide centre cracked panels of aluminium alloy sheet

M. Goto 833 Statistical investigation of the behaviour of microcracks in carbon steels

B. N. Cox and D. B. Marshall 847 Crack bridging in the fatigue of fibrous composites

S. Horibe and R. Hirahara 863 Fatigue crack propagation of sintered silicon nitride in vacuum and air
